AVALANCHE TEAM1 GRANT · $10,000

STRATA.

Avalanche’s on-chain history, turned into art people mint, play and hang on their walls.

straata.xyz · by Not Warhol

THE ARTIST

Not Warhol: a generative artist who has called Avalanche home since 2022.

2022

building only on the C-Chain

700+

AVAX in volume, verifiable on-chain

My Kind of Punks
The Nots
STRATA.

collections released

WHAT STRATA. IS

An ecosystem whose subject is Avalanche itself.

Art

Generative drops drawn from a wallet's own on-chain history, plus special drops with Avalanche projects.

Play

Staking with Riot, a leaderboard, an arcade, and a card game in development.

Trade and own

A market with auctions and names, and a print store: numbered fine-art editions paid in USDC, AVAX or card.

A city to walk

STRATA. 2.0: the whole site is one neon city, one building per part, open to everyone.

HOW THE ART IS MADE

The wallet is the seed. The chain is the paint.

01 READ

The server reads the wallet's Avalanche history: bags, transactions, protocols used.

02 SEAL

At the mint, a seed is fixed on-chain: keccak of the drop, the minter and the data read.

03 DRAW

One deterministic generator turns seed and data into the piece. No randomness after the seed.

04 PROVE

Browser and server draw the same picture; anyone can redraw it and check.

A wallet's own piece is never shown before its mint is final, so nobody can shop for a better result. And Persona keeps changing: the past draws it, and every new transaction the wallet makes reshapes it.

LIVE ON MAINNET

Each release reads a different layer of the chain.

Release	It reads	It becomes	Contract
Contour	NFT bags across 200 Avalanche collections	A survey map: a peak per collection, bag size sets its height	0x0eC2…7507
Persona	Every transaction a wallet makes	A mask split by the wallet's past; every new transaction raises a building on it, a failed one blinks red	0x52B8…647D
HYPOGEUM	A year of Pharaoh V3 activity	An underground room: a ring per period, a hatch per contract	0x73ad…F6F6
Receipt	A supporter's gift	Proof of support, one per wallet	0x841c…769D
Riot	makooor credits reinvested	Splatter that levels up to ten, one per staker	0x489c…9766

LIVE TODAY · THE ECOSYSTEM

Around the drops, a whole place already runs.

Market

Auctions, zones and names for the collections.

Stake + Riot

Stake a Persona, earn makooor credits, reinvest them in a Riot. 116 Personas staked.

Print store

Numbered fine-art prints of your wallet, shipped worldwide.

Leaderboard

Every wallet that used STRATA., ranked by points.

Arcade

Ten classic games inside the city.

Discord

Holder-verified community, with the Keeper role for Receipt holders.

LIVE · STAKE AND RIOT

The community already funds and uses it.

01 STAKE

Stake a Persona without moving it. It stays in your wallet.

02 EARN

Earn makooor credits, claimed to your @handle.

03 REINVEST

Put credits back into a Riot: one level each, up to ten, on-chain.

The credits are sustained by me and by the 21 supporters who gave to the project and hold a Receipt. 116 Personas are staked today. That is a sign the community wants this.

THE PROJECT IN NUMBERS

Since September, the chain has been read at scale.

3.2M
transactions read

146,760
wallets read

13,844
NFTs read across 200 collections

339
pieces minted in Contour, Persona and HYPOGEUM

155
collectors

116
Personas staked

21
supporters holding a Receipt

170
wallets on the leaderboard

Live counters from straata.xyz, 22 Oct 2026.

STRATA. 2.0 · THE NEW SITE

The site is now a city, and every building is a part of the project.

Walk in

Open to everyone with no wallet needed to enter. Connect only when you act.

One building each

Contour, Persona, Stake, Receipt, Museum, HYPOGEUM, Market, Store, Games and the Leaderboard.

Real data

Rooms read the Avalanche C-Chain live, so every wallet sees its own history.

Next, each building keeps gaining interiors, and new drops and partners get their own place in the city.

CASE STUDY · COLLABORATION

HYPOGEUM: Pharaoh V3’s first year, built into a piece.

Earned, not bought

Free mint, one per wallet, only for wallets that had used a Pharaoh contract.

Made of the protocol

Its walls are a year of V3’s own on-chain activity, 8 Oct 2025 to 8 Oct 2026.

A model to repeat

The same format can mark any Avalanche project’s milestone for its own users.

WHY IT MATTERS FOR AVALANCHE

Every piece sends collectors back to Avalanche's own collections, protocols and history.

Contour rewards holding 200 Avalanche collections. HYPOGEUM rewards using Pharaoh. AVAX payments in the store swap through Pharaoh V3. The attention and the money stay on the chain.

THE FORMAT

Two drops every month, all year.

DAY 1 · THE MAIN DROP

A new STRATA. drop on the 1st of every month.

003 on 1 Nov 2026, then one every month through drop 014 on 1 Oct 2027.

AROUND DAY 15 · THE COMMUNITY DROP

A drop for an Avalanche community or protocol, made from its own history.

Nochillio in November, The Grotto in December.

24 drops in twelve months. The grant is what keeps the collections free to collect.

NEXT · 1 NOVEMBER 2026

Drop 003: a free mint for the wallets that found the hidden door.

100 PIECES

Free mint, fixed supply. One guaranteed piece for every wallet approved at the door, one more for a Receipt.

TRADING SUITE

The full trading suite goes live with it.

EARLY FINDERS

A small AVAX bonus on the day, for the people who found the door while it was hidden (planned).

Status: the door and the sign-ups with anti-bot checks are live. The 003 contract is not deployed yet.

NEXT · SPECIAL DROPS · BOTH CONFIRMED

Each Avalanche community gets a drop made from its own collection.

Partner	When	What
Nochillio	Mid-November	Free mint for holders. Each Nochillio opens one matching piece (#N gives #N); the original stays in the wallet. The piece is live code fed by the original's image. 1,337 pieces generated, contract not started.
The Grotto	December	Special drop, launched in December to celebrate The Grotto's birthday.

Same template as HYPOGEUM: the community's users receive a piece made from the community's own history.

IN DEVELOPMENT · CARD GAME

Duel: a collectible card game where every card is also the ground.

The idea

Bury a card as a Stratum to gain permanent mana. There are no land cards. 52 collectible cards in five rarities.

Rarity is variety

Not power. Simulations of about 13,700 games per deck style keep the free decks balanced against collections.

Where it is

Game engine and 20 tests done. Next: human playtest, then art, contracts and sealed packs on Avalanche.

Proposed first drop: packs for the wallets of an existing Avalanche card-game community. No date set; no contract yet.

CONCEPTS · THE GRANT MAKES THESE REAL

Two drops about Avalanche's own history and memory.

The C-Chain portrait

A portrait of Avalanche in three layers, one per chain. Each layer is its own piece, and together they form the final print.

Free to mint, and the final print is sent to everyone who mints.

NFT recycling

Burn NFTs from Avalanche collections that have disappeared. The code reads the art's metadata and creates a new piece inside the STRATA. universe.

Gives dead collections a second life.

Status: both are concepts. No code or date yet, and the recycling contract needs a security review.

ROADMAP

The next twelve months.

When	What	Status
1 Nov 2026	Drop 003, main, with the trading suite	Date set, contract pending
Mid-Nov 2026	Nochillio, community drop	Confirmed, art ready
1 Dec 2026	Drop 004, main	Planned
Mid-Dec 2026	The Grotto birthday drop, community	Confirmed
Jan to Oct 2027	Drops 005 to 014, main: one on the 1st of each month	Planned
Mid-month, Jan to Oct	A community or protocol drop each month	Partners to confirm
2027	Duel card game, the C-Chain portrait, NFT recycling	In development, concepts

SUSTAINABILITY

The grant keeps the collections free. Revenue keeps the project running.

Free by design

Drop 003 and the community drops cost nothing to collect. The grant pays for what free costs: servers, storage, pinning, gas and review.

Paid drops and royalties

Some drops carry a mint price that covers running costs, and every secondary sale pays 5% (ERC-2981).

Print store

Margin on numbered prints, plus voluntary gifts and Receipts from supporters.

Market and partners

Fees on auctions and names, and rented screen space in the city.

Running costs are about $271 a month, or $521 with a modest creator’s pay. At a $10 mint that is about 52 paid mints a month to break even; at $20, 26.

THE ASK · 12 MONTHS · 24 DROPS

Where $10,000 goes.

$10,000

Item	What it pays for	12 months
Hosting and storage	Fly.io upgraded to 4 GB, volume growing to 100 GB, domain	$910
Own server	Indexing, renders and backups	$240
IPFS pinning	Pinata and Filebase for every new piece	$300
APIs and art tools	Chain data, RPC, image credits	$600
AI tooling	Claude subscription used to build and ship	$1,200
Contracts	Gas for 24 drops and the keepers	$400
Security review	Independent review of the new contracts	$1,500
Early-finder bonus	Drop 003, about 11.5 AVAX	$300
Collaborations and community	Partner launches, Discord, announcements	$1,050
Creator’s work	Fair pay for building and running it: $250 a month	$3,000
Reserve	Price changes and AVAX volatility	$500

Estimates from current public prices. Replaced by invoices in the report.

IF THE AMOUNT IS DIFFERENT

The plan flexes with the funding.

Protected first

Drops free to collect, every month.

The rhythm: the main drop on day 1 of each month, the special community drop around day 15.

The servers, storage and pinning that keep it online, as far as the funding reaches.

Flexes first

Shipping the C-Chain portrait print, free to everyone who mints.

Spend on collaborations and community.

The scope of the security review and the creator's pay.

The grant funds twelve months. After that the project continues only if its income covers its costs, so that income is part of the plan: a paid-mint option on some drops, 5% royalties, print store margin, market fees, rented screens and partner sponsorship.

MILESTONES

How you will know it worked.

Deliverable	Proof	By
Drop 003 minted	Verified contract, 100 pieces	Nov 2026
Nochillio drop minted	Verified contract, 1:1 pieces for holders	Nov 2026
Drops 004 to 014	Eleven verified contracts, one a month	Dec 2026 to Oct 2027
The Grotto birthday drop	Verified contract	Dec 2026
A community drop a month	One verified contract each, twelve in all	Monthly
Duel playtested	Playtest results, then contracts	2027
C-Chain portrait minted	Three layer contracts, final print	2027
Public code	github.com/Not-Warhol/strata-public	Live

A PERSONAL NOTE

I never built STRATA. to get rich. Avalanche has been my home since 2022, and I wanted to give the people here something beautiful and fun to do on-chain, made from their own history. Since September, on my own, that became five collections, a market, staking, a print store and a city. Persona and HYPOGEUM were free to mint, and most Contour mints cost very little. None of it was built with a return in mind.

What kept it going was you. The wallets that minted, staked, played and gave to the project through a Receipt are the reason the credits flow and the collections stay free. This grant lets me give that back for a full year: two drops every month, partners from across the ecosystem, and a fair wage so STRATA. does not remain a side project that fades when I run out of time and money.

Thank you for reading, and for building Avalanche together.
